

Features

Aware includes many features to make your flying as safe and relaxing as possible. Our aims are simple: We want to reduce pilot workload, increase situational awareness and encourage "eyes out of the cockpit" aviation.

- Full 3D airspace warnings with frequencies
- Airspace updated in line with AIRAC cycle
- Comes with Airbox own vector mapping as standard
- Search for Airfields by names or ICAO code.

Above is an example of what the Aware app will look like whilst in flight. The 5 minute black and white line will warn you of any airspace you are about to or are entering. The Orange/Red Airspace warning boxes at the side will give you more information on the airspace.

Listening Squawks are a new feature in Aware. These enable traffic controllers to alert a pilot via radio if they are in close proximity to controlled airspace – if it looks like their aircraft is going to infringe. Any aircraft fitted with a Mode A/C or Mode S transponder can use these codes

The above screenshot shows what happens when you press the Red Triangle in the bottom left hand corner of the App. On this page your current position will show up on screen as well as the emergency transponder codes and frequencies. Press close or tap anywhere on this screen to remove this message.

AIRBOX aware™

the airspace warning app for pilots

Here you can search for an airfield by Name or ICAO code.

Settings – here you will find Manage Charts, Downloads, Customise your units, Demo Mode and also your Airbox Account details.

This button will provide your current position and give the relevant emergency codes.

Make sure this icon is highlighted so the maps moves with your position.

The Data Bar provides the User with flight relevant information such as Speed, Altitude and Track. A GPS accuracy indicator is also present, which gives a figure for the accuracy of the signal being received.

Clicking on the aware logo will take you to –

- Version number
- Airbox website
- Fly on Track
- This manual

Airspace Warnings, these will bounce when a new warning appears.

Listening Squawks
